DETAILED ACTION

1. Claims 1-16 are pending as amended on 2 February 2005.
2. Upon review, the restriction requirement in the Office action mailed 5 December 2008, contained an error in the grouping of claims and is therefore withdrawn. A new requirement is entered below. The examiner again apologizes for any inconvenience this may have caused.

Restriction Requirement

3. Restriction is required under 35 USC 121 and 372.

This application contains the following inventions or groups of inventions that are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim 2-4, 6, 7, 9, 10 and 12-15, drawn to a color filter comprising a compound of formula 1.

Group 2, claims 5 and 8, drawn to a plasma display comprising a phthalocyanine compound.

Group 3, claim 11 and 16, drawn to a color filter comprising a phthalocyanine compound.

4. Claim 1 links inventions 1 and 2. The restriction requirement between the linked inventions is **subject** to the nonallowance of the linking claim, claim 1. Upon the indication of allowability of the linking claim, the restriction requirement as to the linked inventions **shall** be withdrawn and any claims depending from or otherwise requiring all

the limitations of the allowable linking claim will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104. **Claims that require all the limitations of an allowable linking claim** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, the allowable linking claim, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 USC 121 are no longer applicable. *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

5. The inventions listed as Groups 1, 2 and 3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: phthalocyanine compounds in color filters, as required by independent claim 11, are not novel as shown by US Patent 3,853,783 (Tucker hereinafter) (Title, Abstract).

Election

6. Since a telephone call made to Tyler Stevenson on 18 September 2007 to request an oral election to the previous restriction requirement did not result in an

election being made, no telephone communication regarding the restriction has been made.

7. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 USC 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
